APLF ASEAN Bangkok/
19th-20th October 2022

FALL/WINTER 23/24

We need to be encompassed, to be cuddled and warmed;
soft materials and lines that leave us free.

We let reality coexist with artificial and virtual sets.

Lavish yet ultra-light volumes, ecofriendly materials let us to
play on contrasts through the touch

WOODED

A wide range of browns to recall nature with earthy nuances: these shades express the charm of primordial tones.

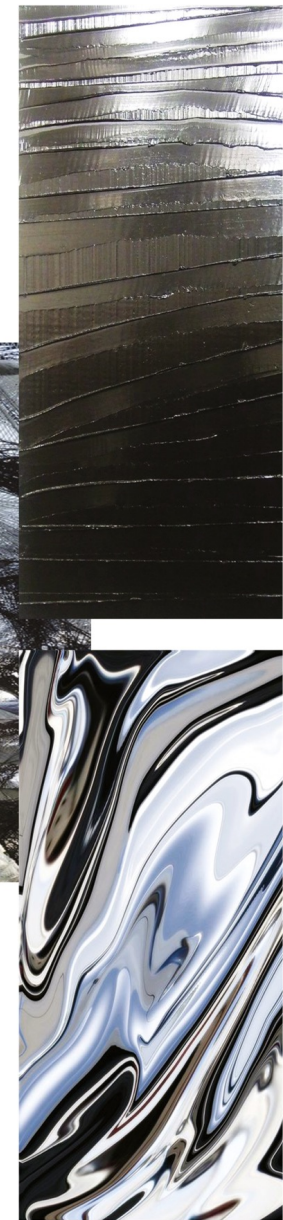

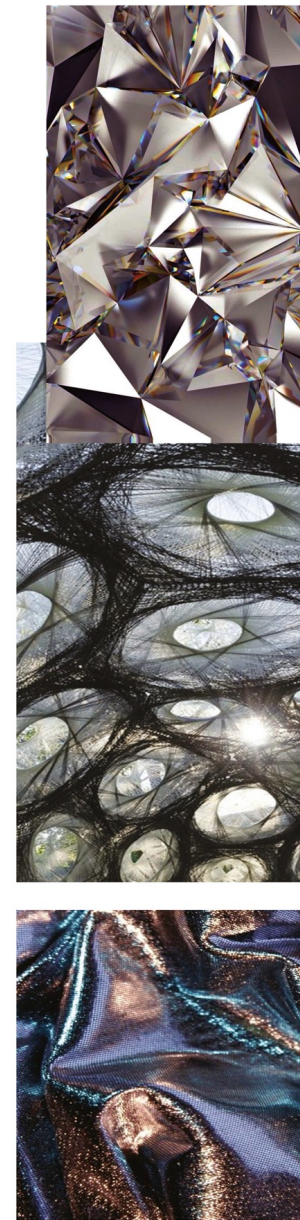

Such colors remind us of the bond we have with the environment around us.

REFLEXS

Black shades mixed with infinite metallic nuances that remind us of technology and modernity.

Reflective, shiny reflections and almost dazzling surfaces in different shades to convey light and brightness

ORGANIC

Green in all its nuances can only make us think about the harmony and fertility of nature and the organic world, also relating to the theme of sustainability.

All-encompassing warmth, comfort and delicacy are expressed with colors rich in chlorophyll.

FREEDOM

The shades of blue are combined with fuchsia which stand for imagination and inspiration with strong juxtapositions for a modern theme.

Graphics recalling a retro look, rely on the astonishment created by repetition.
